

PRESS RELEASE

Cegedim Logiciels Médicaux to supply four new health centers in the Greater Paris area

Crossway CDS certified solution wins another bid

Paris, December 1, 2016

Cegedim Logiciels Médicaux (CLM), medical software publisher and service provider to healthcare professionals, has been chosen by Syndicat Intercommunal pour l'Informatique Municipale du Val-de-Marne (SIIM 94), the IT service provider for municipalities in the Val-de-Marne department, to manage four municipal health facilities in the department. These four facilities will join the 180 health centers in France already equipped with the Crossway CDS certified solution.

Providing therapeutic and preventative care at both general and specialized facilities, municipal health centers fill the need for convenient local healthcare providers. CLM will work with local teams to analyze their needs and set up the new system, assisting with configuration, training and maintenance.

Optimized medical and administrative management

After a call for bids, SIIM 94 chose CLM's **Crossway CDS** for the computerization of its Villejuif, Ivry-sur-Seine, Gentilly and Arcueil health centers. The contract covers installing medical records on 63 workstations, with hosting provided by Cegedim. The first roll-outs are planned for the end of this year.

Along with Vitry-sur-Seine, which is already using **Crossway CDS**, there will now be five health centers in Val-de-Marne running the software, which shows that it is well suited to the needs of healthcare professionals working in these kinds of facilities. The software has earned e-health certification for "clinics and medical centers" from ASIP Santé, meaning users are eligible for the latest remuneration methods.

It incorporates all of the functions needed to run a health center, including the management of patient records, electronic treatment forms, third-party payments, administrative records and scheduling.

About Cegedim Logiciels Médicaux (CLM):

Cegedim Logiciels Médicaux (CLM), medical software publisher and service provider, is a leading player in doctor computerization in France. CLM listens closely to the needs of healthcare professionals, and its teams develop and market solutions that help them run their practices day in and day out. In today's rapidly changing environment, notably with respect to medical professional demographics and course of care, CLM's software offerings (MLM, Crossway, MédiClick, Crossway CDS, and MSP Solution) give doctors patient record management solutions that are 100% certified, suited to their practice, regulatory compliant, innovative and scalable. Medical content can be personalized for each specialty, interfaces adapt to multiple work spaces (private practice, group practice, multidisciplinary clinic or medical center), and the software enhances mobility, data sharing and care coordination. The company's innovative software uses Pack Connect CLM for connected health and Docavenue for the most advanced doctor-patient communications. CLM employs 150 people, including more than 100 in regional offices to give doctors personalized service.
