

PRESS RELEASE

Cegedim Logiciels Médicaux wins a call for bids by the Annecy Hospital Center

MLM, chosen for its electronic invoicing management, facilitates multi-site coordination

Paris, December 15, 2016

Cegedim Logiciels Médicaux (CLM), medical software publisher and service provider to healthcare professionals, announces that the Annecy Hospital Center has chosen its MLM web-based solution for its electronic invoicing management, to equip 37 specialist doctors. MLM will make it easy for these doctors, who operate independently within the hospital, to share electronic invoicing with their patients.

In France, 10.3%¹ of doctors combine private practice with hospital practice, or independent work with salaried employment. This segment is growing and will need more flexible tools, notably for electroning invoicing management.

The Annecy Hospital Center, with its 40,000 hospital stays annually, is well aware of this need and has embraced the digital trend. It wanted a solution that would allow its doctors to more effectively manage their private and hospital practices. After reviewing submissions, it opted for Cegedim Logiciels Médicaux's web-based MLM solution for electronic invoicing management. Starting in January 2017, 37 of the hospital's specialist doctors will be able to use the software.

The right solution for mobility inside and outside of the hospital

With their login information, the hospital's anesthesiologists, cardiologists, gastroenterologists and gynecologists will be able to connect and send electronic invoicing from anywhere in the facility using a PC, Mac, tablet or smartphone.

"Our solution for sending electronic invoicing is a good fit for the Annecy center's push towards high tech. The hospital wanted an innovative solution that is in step with the way its operating methods are evolving. One that meets its doctors' growing need for mobility both inside and outside the hospital, because several of them also have private practices in town," explains *Bruno Delahaye, Cegedim Logiciels Médicaux Regional Director*.

About Cegedim Logiciels Médicaux (CLM):

Cegedim Logiciels Médicaux (CLM), medical software publisher and service provider, is a leading player in doctor computerization in France. CLM listens closely to the needs of healthcare professionals, and its teams develop and market solutions that help them run their practices day in and day out. In today's rapidly changing environment, notably with respect to medical professional demographics and course of care, CLM's software offerings (MLM, Crossway, MédiClick, Crossway CDS, and MSP Solution) give doctors patient record management solutions that are 100% certified, suited to their practice, regulatory compliant, innovative and scalable. Medical content can be personalized for each specialty, interfaces adapt to multiple work spaces (private practice, group practice, multidisciplinary clinic or medical center), and the software enhances mobility, data sharing and care coordination. The company's innovative software uses Pack Connect CLM for connected health and *Docavenue* for the most advanced doctor-patient communications. CLM employs 150 people, including more than 100 in regional offices to give doctors personalized service.
