GROUPE PASTEUR MUTUALITÉ PICKS DOCAVENUE, THE APPOINTMENT SCHEDULING SOLUTION, FOR ITS MEMBERS

Docavenue is the latest addition to Groupe Pasteur Mutualité’s range of services. This practical tool adds significant value for the group’s members by simplifying their operations, letting doctors spend more time with patients, and enhancing doctor-patient interactions.

Letting healthcare professionals focus on care, not administrative tasks

Administrative tasks directly affect the amount of time healthcare professionals spend caring for patients. Groupe Pasteur Mutualité wanted to offer its members an innovative new service that would allow them to devote themselves to providing quality care, but without causing patients to cancel appointments.

Groupe Pasteur Mutualité looked to Cegedim, the medical IT leading expert. Cegedim already supplies 23,000 doctors and 44,000 allied health professionals in France, and its Docavenue solution was a perfect fit.

“Our two companies share a deep understanding of the healthcare professionals needs and an underlying passion – to design innovative services, like Docavenue, so that professionals can improve the way they run their practices,” said Amanda Lehmann, Head of Projects and Strategic Planning at Groupe Pasteur Mutualité.

A simple, intuitive online appointment scheduling solution

The package being offered to Groupe Pasteur Mutualité members combines all the advantages of Docavenue:

- Healthcare professionals get an web environment where they can show patients available appointment times, displayed differently for new or current patients;
- Patients sign up for appointments on the site or using the smartphone app, and the appointments are automatically added to the healthcare professional’s schedule;
- Patients receive a text message reminder so they don’t forget their appointment.

The online service is available 24/7. Easy to use and extremely flexible, it can be personalized to suit individual patient management systems and also includes the option of a virtual secretary service.

Docavenue is developed and hosted by Cegedim, which has multiple Health Ministry certifications for hosting health records and personal information.

About Docavenue:

Docavenue is an online medical services platform that lets doctors, healthcare facilities and clinics manage their scheduling and virtual secretary functions. For patients, not only does Docavenue make it easier to schedule appointments with GPs, specialists and dentists, it also offers a range of services for before and after the visit, such as useful information about illnesses, medications – with certified profiles from the BCB (Base Claude Bernard) database – and testing. Docavenue was developed and is hosted by Cegedim, which has multiple Health Ministry certifications for hosting medical records and personal information.
