

PRESS RELEASE

Crossway by Cegedim Logiciels Médicaux is the first software used to submit an electronic prescription

Part of the French national health insurer's PEM2D experiment

Boulogne-Billancourt, December 12, 2017

Cegedim Logiciels Médicaux (CLM), medical software publisher and service provider to healthcare professionals, announces that its Crossway software is part of a pioneering effort to implement electronic prescriptions that will simplify doctor-pharmacist interactions and make patients' course of care more secure.

CLM innovates the field of e-prescribing. Its Crossway software was allowed to create the first e-prescription to the pharmacist for transmission to the CNAM (Caisse Nationale d'Assurance Maladie), France's national health insurer. This is the first key step towards a functioning e-prescription system for medications and medical devices, christened PEM2D. The system is being tested in several departments in the Val de Loire, Saône-et-Loire and Maine-et-Loire.

The Crossway version that includes e-prescription lets doctors give their patients a printed prescription with a QR code that links to all necessary medication information. The pharmacist then scans the code, and its software displays all the prescription information. There is no need to re-enter the information, preventing mistakes and making fulfillment more secure. The encrypted code thanks to the doctor's professional cards also gives CNAM a way to fight fraud.

It also provides doctors with added-value services through information feedback on drugs delivery, with patient consent.

"Having worked on electronic treatment forms, remote health insurance services, medical messaging systems and electronic health records, we are now pleased to be a part of e-prescribing. Healthcare institutions and professionals have been communicating electronically more and more in recent years. CLM is playing an active role in that process, always by striving to meet the changing needs of medical practitioners," said [Dany Huppenoire, CEO of Cegedim Logiciels Médicaux](#).

About Cegedim Logiciels Médicaux (CLM):

Cegedim Logiciels Médicaux (CLM), medical software publisher and service provider, is a leading player in doctor computerization in France. CLM listens closely to the needs of healthcare professionals, and its teams develop and market solutions that help them run their practices day in and day out. In today's rapidly changing environment, notably with respect to medical professional demographics and course of care, CLM's software offerings (MLM, Crossway, MédiClick, Crossway CDS, and MSP Solution) give doctors patient record management solutions that are 100% certified, suited to their practice, regulatory compliant, innovative and scalable. Medical content can be personalized for each specialty, interfaces adapt to multiple work spaces (private practice, group practice, multidisciplinary clinic or medical center), and the software enhances mobility, data sharing and care coordination. The company's innovative software uses Pack Connect CLM for connected health and [Docavenue](#) for the most advanced doctor-patient communications. CLM employs 150 people, including more than 100 in regional offices to give doctors personalized service.
