Cegedim SRH works with TRAPIL to modernize its payroll management

TEAMS^{RH} boosts HRIS efficiency at TRAPIL, France's top oil and gas transport company

Boulogne-Billancourt, September 25, 2017

Cegedim SRH, an innovator in cloud-based HR and outsourced HR services, has been chosen by TRAPIL to update its HR processes, notably payroll management for its 800 employees in 40 operating units. The TEAMS^{RH} modular platform offers the oil and gas transport company the most advanced technologies on the market.

To incorporate new regulatory standards into its HR processes, TRAPIL – the oil and gas transport specialist – had to give up the HR and payroll management solution it had been using for the past 15 years. It had clear goals for its replacement: a faster, more efficient solution that seamlessly manages both payroll and employee administration functions. TRAPIL also wanted more secure, open communication between HR process participants.

After looking at all of the solutions currently on the market, TRAPIL chose Cegedim SRH's TEAMS^{RH}. The TEAMS^{RH} solution met all of TRAPIL's requirements for scalability and was a good fit with other ongoing projects. Those projects are both technological, such as redesigning the company's intranet, and personal, with efforts to encourage more collaboration among employees.

Update HRIS to upgrade HRIS

TRAPIL's redesigned HRIS, which coincided with the roll-out of TEAMS^{RH}, has been up and running since January 2017. Payroll management for its 800 employees is now efficient and secure.

"In updating our payroll management tool, we needed to do a few things: reinvigorate our processes and give our payroll and HR teams the versatile, secure tools they need to perform their tasks effectively. The transition was a success because we had the eager participation and collaboration of our HR and IS teams, and we had personalized assistance from Cegedim SRH's representatives," said [Frédéric Bielecki, TRAPIL's Project manager](#).

Now that the payroll solution is up and running, TRAPIL is moving on to its next phase and will roll out the time management module over the coming months.

"TRAPIL wanted a set-up that would both improve operating performance and lower management costs. TEAMS^{RH} gives them an HRIS that is easy to use but a powerful tool for managing and securely automating larger and larger amounts of data. We were pleased to help TRAPIL make this a successful transition," said [Olivier Rouas, Head of Development at Cegedim SRH](#).
