After beating forecasts in the first quarter of 2006 and turning in a more moderate performance in the second quarter, CEGEDIM Group's first-half turnover growth was in line with expectations at 8.2%. The Group has now posted very good third-quarter growth of 7.7%, confirming the trend established since the start of 2006. Growth in the nine months to September comes to 8.1%, including like-for-like growth of 5.6%.

In the **“CRM and strategic data”** sector, international activities continue to grow at a brisk pace, up 15% over nine months on a like-for-like basis and up 21% overall. The Group’s international success is taking over from French activities as the growth driver and is validating CEGEDIM’s goal of solidifying its European leadership position and its role as a key global player in these markets.

“Healthcare professionals” activities continued their dynamic growth in the third quarter, bringing growth over nine months to 17%, including 12% on a like-for-like basis. Robust gains early in the year are naturally likely to subside somewhat over the rest of the year, notably in UK software businesses and more seasonal promotional activities.

Continuing first-half trends, **“Healthcare insurance services”** and **“Technologies and services”** turnover rose at a moderate pace, in line with forecasts.

2006 outlook

The CEGEDIM Group’s previously announced forecast for 2006 consolidated turnover of approximately €535 million is unchanged.
