

## PRESS RELEASE

### **Cegedim Logiciels Médicaux strengthens its presence in health centers**

CLM to supply software and training to five new health centers and present its latest products at the Health Center Conference in Paris on October 11-12

**Boulogne-Billancourt, August 31, 2018**

**Cegedim Logiciels Médicaux (CLM), medical software publisher and service provider to healthcare professionals, continues to successfully roll out its dedicated health center solution in France. A total of five new facilities – three mutual-run health centers in Burgundy, a municipal health center in the Dordogne region, and the Mont-de-Marsan hospital's health center – have decided to implement the CLM solution.**

*Cegedim Logiciels Médicaux (CLM)* is helping expand local access to care with solutions that make it easier for multiple healthcare professionals to provide day-to-day patient care. The health center suite now includes *Crossway* software and the full web *MLM (monLogicielMedical.com)* solution. Burgundy's Mutualité Française Bourguignonne selected these solutions for its health centers in Imphy, Nevers, and Tonnerre, where they will be used by doctors, dentists, allied health professionals, and administrators.

Cegedim Logiciels Médicaux will also equip the multidisciplinary municipal health center and dental clinic in Lardin-Saint-Lazare, Dordogne, with a package that includes *Crossway*. The health center, run as a separate entity by the hospital in Mont-de-Marsan, Landes, opted for *MLM FSE* software to allow the center's salaried doctors to send electronic treatment forms.

“New ways of organizing treatment are developing at the intersection between independent professionals and hospitals. These new solutions are necessary to ensure care is available in less densely populated areas. We stand out for the quality of our solutions and the experience we have gained working alongside healthcare professionals, both of which put us in a great position to help usher in these new forms of treatment even as we continue to serve more traditional facilities. Our teams are helping health centers select and win approval for the solution that best meets their needs,” said *Dany Huppenoire, CEO of Cegedim Logiciels Médicaux*.

#### **Datadock-certified training**

*Cegedim Logiciels Médicaux* supplies training along with its software, helping health centers get the most out of its solutions. This year the company earned Datadock certification, highlighting the quality of its training and ensuring that training costs will be covered by the OPCA<sup>1</sup>.

There are 1,600 health centers in France<sup>2</sup>. They can be run by municipal governments, associations, or mutual organizations. CLM offers centers solutions suited to their operational, regulatory, and security needs, regardless of status or size.

To date, more than 420 clinics and health centers have already adopted a CLM solution. CLM will present its latest products at the [National Health Center Conference](#) in Paris on October 11<sup>th</sup> and 12<sup>th</sup>.

<sup>1</sup> OPCA: “Organismes paritaires collecteurs agréés”, industry bodies that collect and manage funds companies are required to contribute for employee training.

**About Cegedim Logiciels Médicaux (CLM):**

Cegedim Logiciels Médicaux (CLM), medical software publisher and service provider, is a leading player in doctor computerization in France. CLM listens closely to the needs of healthcare professionals, and its teams develop and market solutions that help them run their practices day in and day out. In today's rapidly changing environment, notably with respect to medical professional demographics and course of care, CLM's software offerings (MLM, Crossway, MédiClick, Crossway CDS, and MSP Solution) give doctors patient record management solutions that are 100% certified, suited to their practice, regulatory compliant, innovative and scalable. Medical content can be personalized for each specialty, interfaces adapt to multiple work spaces (private practice, group practice, multidisciplinary clinic or medical center), and the software enhances mobility, data sharing and care coordination. The company's innovative software uses Pack Connect CLM for connected health and Docavenue for the most advanced doctor-patient communications. CLM employs 150 people, including more than 100 in regional offices to give doctors personalized service.
