### **Private practitioners in hospitals: Tours University Medical Center picks Cegedim Logiciels Médicaux for sending electronic treatment forms**

Web-based MLM FSE solution will be used by doctors who also have a private practice at their hospital

**Boulogne-Billancourt, October 11, 2017**

**Cegedim Logiciels Médicaux (CLM), software publisher and service provider to the healthcare profession, announces that the Tours University Medical Center (CHU) has selected its web-based MLM FSE solution. The software will be used to manage electronic treatment forms for doctors who have private practice agreements with their hospital.**

In France, around 4,500 or 10% of all doctors working in hospitals also operate a private practice within the hospital<sup>1</sup>. These doctors are required to send electronic treatment forms (*feuilles de soins électroniques*, FSE) for the patients they see in this capacity to the state-run health insurance system.

The Tours CHU, the leading hospital network in the Centre-Val de Loire region, now lets dual practitioners at its three locations send their electronic treatment forms using *MLM FSE*. After a call for bids, it picked the autonomous web-based solution because it is easy to install and use, meets regulatory requirements, and is guaranteed to keep pace with new laws and pricing schedules.

#### **Adapting to different ways of practicing medicine**

*MLM FSE* is easy to install and can be accessed anywhere. It is designed for doctors operating a private practice within a hospital, doctors with an independent office, or some combination of the two<sup>2</sup>. Using their login information, users can sign on and send treatment forms at their convenience from either a PC or a Mac.

"The line between private practice and hospital practice is getting blurry. We are seeing more and more cooperation, and doctors need powerful tools at their fingertips to manage their activities, even outside the office. Our innovative solution for sending electronic treatment forms meets this need by combining the versatility of software with the simplicity of the web. Meeting these needs helps medical facilities attract the best doctors," notes *Thierry Cazettes, Director of Large Accounts at Cegedim Logiciels Médicaux*.

<sup>2</sup> Combining an independent office with outside consultations at the hospital.

**About Cegedim Logiciels Médicaux (CLM):**

Cegedim Logiciels Médicaux (CLM), medical software publisher and service provider, is a leading player in doctor computerization in France. CLM listens closely to the needs of healthcare professionals, and its teams develop and market solutions that help them run their practices day in and day out. In today's rapidly changing environment, notably with respect to medical professional demographics and course of care, CLM's software offerings (MLM, Crossway, MédiClick, Crossway CDS, and MSP Solution) give doctors patient record management solutions that are 100% certified, suited to their practice, regulatory compliant, innovative and scalable. Medical content can be personalized for each specialty, interfaces adapt to multiple work spaces (private practice, group practice, multidisciplinary clinic or medical center), and the software enhances mobility, data sharing and care coordination. The company's innovative software uses Pack Connect CLM for connected health and Docavenue for the most advanced doctor-patient communications. CLM employs 150 people, including more than 100 in regional offices to give doctors personalized service.
