

With e-FSE, its online data transmission solution, Cegedim Logiciels Médicaux is working with physicians to meet their new regulatory obligations

Paris, October 12, 2010 – With **e-FSE[®]**, its first online transmission solution for patient treatment forms, [Cegedim Logiciels Médicaux](#) (CLM), software publisher and service provider dedicated to the medical profession for over 20 years, is working with physicians in the context of the new regulations presented September 28 by the government dealing with Social Security financing in 2011.

Moving towards widespread dematerialization of transactions

As part of the 2011 Social Security Financing bill, the government has pledged to pursue a certain number of cost-saving and austerity measures aimed at streamlining healthcare spending. Health insurance needs to modernize, which means doing away with paper. The implementation of electronic treatment forms and online transmission solutions is thus a critical step. To facilitate and accelerate the process, the government has instituted a system of penalties for reluctant practitioners and medical establishments, and financial incentives for “the good guys”. Each paper treatment form will be subject to a €0.50 tax, whereas establishments using properly generated electronic forms will receive a €0.07 subsidy for each form, plus a lump sum of €250 per year.

CLM continues its tradition of close partnership with healthcare professionals

With **e-FSE**, CLM wanted to cater to all of the physicians that have not yet cleared the hurdle of online form transmission, or who want a more advanced electronic treatment form solution. Aimed at general practitioners and specialists, the **e-FSE** solution facilitates day-to-day Electronic Treatment Form management:

- easily manage NGAP / CCAM procedures
- “favorite” procedures by specialty to save time
- visualize sent invoices and those pending transmission, and manage rejected files for optimized practice management
- course of care management – treating physician
- CMU and third party payer management
- up-to-date procedures and tariffs in real time
- access to the Espace Pro on the ameli.fr site for online reporting (sick leaves, treatment protocols, etc.)
- automatic data backup
- no software to install

e-FSE software is SESAM-Vitale 1.40 approved and complies with the personal health data hosting decree, for which Cegedim received a favorable rating on 18 February 2010.

A dedicated website, a simple product

So that physicians can get started with Electronic Treatment Forms in just a few clicks, CLM has created the www.e-fse.fr website, which offers:

- videos demonstrating the software and procedure listings
- online purchase options (fixed line SESAM-Vitale card readers included)
- subscription forms
- user guide downloads
- login information as soon as the purchase is approved

- startup of electronic treatment forms on the same site

In addition, by subscribing to **e-FSE**, the user will **receive a chance to try out** secure online prescriptions, with BCB[®], the first medication database authorized by the *Haute Autorité de Santé*.

*About
Cegedim
Logiciels
Médicaux
(CLM) :*

CLM has more than 20 years' experience computerizing the healthcare profession and is a part of Cegedim Healthcare Software. With LC 2010, it offers a complete range of communicative software and related services dedicated to general practitioners and specialists.

Designed to meet the needs of a changing business environment, notably with respect to medical profession demographics and the way care is organized, software in the LC 2010 range (Premium Crossway, Cardiolite, Eglantine and Medigest) and MédiClick range ensure healthcare professionals flexibility and scalability, while allowing them to pick the solution best suited to their specialty, user preferences and type of practice (independent, group, healthcare center or network, etc.). Structured, communicative and interoperable, these products are designed with information sharing and the DMP (French Personal Medical File) in mind.

CLM works closely with its physician clients through its network of 15 regional branch offices.
