

RM INGENIERIE WILL PRESENT ITS LATEST TECHNOLOGICAL ADVANCES FOR MEDICAL PERSONNEL AT THE MEDEC 2009 CONFERENCE

TEST OUT RMI'S HIGH-PERFORMANCE SOLUTIONS AT STAND G08, LEVEL 3

Paris – March 5 2009 – At the MEDEC 2009* conference, Cegedim Group subsidiary RM Ingénierie (RMI) will present, in partnership with Cegedim Logiciels Médicaux (stand G08, Informedica), its solutions designed for general practitioners, specialists and physical therapists. Visitors are invited to stop by and test its Hi-Tech modules for physical therapy and its software tailored to the medical environment.

- **Avant-garde solutions perfectly suited to the physical therapy field**

RMI has been developing mobility analysis and therapy solutions for nearly five years now. These are based on cutting-edge technologies and employ sensors to allow therapists and physicians to make physical assessments of the patient.

A veritable body movement “research facility”, **BioVal®** enhances the therapist’s ability to analyze patients’ movements while developing their mobility and balance. **BioVal®** uses MotionPod, a small, ultralight unit about the size of a watch. MotionPod has sensors and can be positioned anywhere on the body; it lets the user make quick, precise and complete calculations and medical diagnostics.

BioRescue® uses high-performance technology and biofeedback to make physical therapy entertaining. It comprises a platform equipped with 1,600 pressure sensors, ensuring precise analysis, and software designed by RMI.

- **Electronic transmission of treatment forms**

Pocket Vital® is a free-standing solution for transmitting treatment forms electronically. It comprises a Pocket PC for managing patient data and a **Carte Vitale** reader, giving practitioners the ability to take their patient

files with them and make notes on the move. The system features an intuitive and comprehensive interface.

- **Solution for medical centers**

RM Ingénierie offers a solution tailored to medical centers who want a **single software** suited to the needs of each profession: doctors, physical therapists, nurses, etc. **Access to the networked patient database** is secured by user rights management.

* MEDEC 2009 will take place at the Paris Palais des Congrès at Porte Maillot from 11 to 13 March 2009. Website: www.lemedec.com

About RM Ingénierie (RMI):

A subsidiary of CEGEDIM Group, the French leader in medical information technology, RMI boasts nearly 25 years' experience serving healthcare professionals. In 1984, RMI designed France's first software for managing physical therapy practices. The company now offers a complete range of software (+4000 range and the **BioRescue and BioVal** physical therapy solutions) for paramedical professionals: nurses, physical therapists, speech therapists, orthoptists, chiropractors, podiatrists, midwives, and so on. With its national presence and specialized customer support center, RMI keeps in close contact and provides high quality services to its 27,000 users. RM Ingénierie belongs to CEGEDIM Group's "Healthcare and strategic data" division.
