

PRESS RELEASE

Cegedim Logiciels Médicaux to supply the Chablis Multidisciplinary Health Center

The project will help coordinate care in northern Burgundy

Boulogne-Billancourt, February 6, 2018

Cegedim Logiciels Médicaux (CLM), medical software and services provider to healthcare professionals, has been chosen to supply the Chablis Multidisciplinary Health Center with its [Solution MSP](#). The deal will give area medical and allied health professionals access to a collaboration platform geared toward facilitating daily practice and the successful coordination of patient care.

The multidisciplinary health center in Chablis has joined neighboring centers in Montbard (21) and Vézelay (89) in choosing [Cegedim Logiciels Médicaux](#) as its new IT partner. Opening in May 2018, the center will house 15 healthcare professionals, including three general practitioners; a number of other medical (midwife, dentist) and allied health professionals (nurses, physical therapists, podiatrist, etc.); home care nurses; and two pharmacies.

[CLM's Solution MSP](#) is specifically designed for these kinds of facilities, whose growth is helping maintain local care options for communities around the country.

[CLM'sIt](#) offers professionals a full range of tools for managing the medical and administrative aspects of care (EHR, billing and accountancy, invoicing, and more). The software also makes it easier for professionals to work together using secure messaging and care coordination tools to schedule multidisciplinary team meetings, for example. The platform is based on the [MLM \(monLogicielMedical.com\)](#) solution, which in early 2017 earned Version 2 of the e-Santé "Health Clinics and Health Centers" certification.

Personalized collaboration for designing shared practices

A dedicated CLM project manager will help the health center define its specific needs at every stage of implementation, from installation to training and ongoing assistance.

"We are very pleased to be working with the Chablis multidisciplinary health center and putting our expertise to work for its patients by supplying a solution recognized for its flexibility and wide array of functions. Rolling out this new project over the course of the year will confirm that we have a strong presence in the Burgundy-Franche Comté region and are expanding our multidisciplinary practice solution nation-wide," said [Dany Huppenoire, CEO of Cegedim Logiciels Médicaux](#).

Cegedim Logiciels Médicaux solutions are already widely used in the southern part of the region, for example in Fours in the department of Nièvre (58), as well as in the department of Saône-et-Loire (71), where CLM supplies the health centers of Autun, Monteau-les-Mines, Paray-le-Monial, Chauffailles, Lugny, and Tournus.

To date, more than 420 health clinics and health centers have adopted a CLM solution.

About Cegedim Logiciels Médicaux (CLM):

Cegedim Logiciels Médicaux (CLM), medical software publisher and service provider, is a leading player in doctor computerization in France. CLM listens closely to the needs of healthcare professionals, and its teams develop and market solutions that help them run their practices day in and day out. In today's rapidly changing environment, notably with respect to medical professional demographics and course of care, CLM's software offerings (MLM, Crossway, MédiClick, Crossway CDS, and MSP Solution) give doctors patient record management solutions that are 100% certified, suited to their practice, regulatory compliant, innovative and scalable. Medical content can be personalized for each specialty, interfaces adapt to multiple work spaces (private practice, group practice, multidisciplinary clinic or medical center), and the software enhances mobility, data sharing and care coordination. The company's innovative software uses Pack Connect CLM for connected health and Docavenue for the most advanced doctor-patient communications. CLM employs 150 people, including more than 100 in regional offices to give doctors personalized service.
