

Cegedim e-business presents its dematerialization solutions at the Solutions DEMAT' Trade Fair

From October 4-6, 2011 – CNIT Paris La Défense – Stand F41

Paris, September 8, 2011 – Cegedim e-business announces that it will be presenting its offer of corporate solutions at the Solutions DEMAT' Trade Fair, to be held at the CNIT Paris La Défense from October 4-6, 2011.

Today the dematerialization of documents is an essential means of exchanging documents and plays a key role in a company's performance. All the functions in a company are concerned by electronic exchanges: purchasing, human resources, accounting, etc.

Since 1992, thanks to its experience in publishing professional software and hosting and processing complex information, the Cegedim Group proposes a complete dematerialization offer for all types of documents exchanged between companies, in **all sectors of activity**, in Europe and throughout the world.

GIS (Global Information Services) by Cegedim e-business: the most complete international platform for dematerialization in SaaS mode on the market today

Cegedim e-business assists companies in the **dematerialization** of all their management documents and the **automation** of their processes, from ordering through to invoicing and payment.

For this, Cegedim e-business proposes the **GIS (Global Information Services)** platform, which is a unique offer encompassing one of the largest European electronic exchange networks (especially invoicing) and full, multi-document dematerialization services (simple and fiscal, EDI, and archiving dematerialization).

The GIS platform centralizes all the services necessary for the dematerialization of a company's documents:

- *Deskom*, a service which dematerializes and automates the processing of all invoices, in simple or fiscal dematerialization.
- *Sign & Archive*, to sign and archive all types of electronic documents.
- *EDI Network*, to process all the Supply Chain EDI flows for all sectors while respecting their specificities.
- *The e-factory*, electronic publishing, digitalization, and data extraction of image and pdf documents to dematerialize all incoming and outgoing documents as of the project launch phase.

Cegedim e-business's GIS platform counts over 60,000 companies connected throughout the world and processes 250 million flows exchanged per year.
