

## PRESS RELEASE

---

### **Cegedim Logiciels Médicaux provides IT for the Nimes Health Center**

Simplifying care coordination for patients in the Gard department

**Boulogne-Billancourt, November 27, 2017**

**Cegedim Logiciels Médicaux (CLM), medical software publisher and service provider to healthcare professionals, has been chosen by the Nimes Mutual Health Center to manage medical records and patient administration. The center's medical staff, including dental specialists, will use CLM's [Crossway](#) solution, which is certified for multidisciplinary health centers.**

With nine medical practices, four dental offices and an administration team, the Nimes Health Center offers a variety of care to local residents in several specialty areas: cardiology, dermatology, endocrinology, gastroenterology, gynecology, and ENT.

The Health Center wanted a solution suited to the specific needs of each of the Center's healthcare professionals, with respect to their specialty area and preferences – one that would make it easier for peers to communicate and save time on administrative tasks.

#### **CLM's products win over another mutual provider**

[Cegedim Logiciels Médicaux's Crossway](#) solution, with a dental module supplied by partner IDEM Santé, was chosen after a review of current market offerings and will be rolled out in the first quarter of 2018.

The Nimes facility is part of a nationwide network of mutual centers, France's Réseau National des Centres de Santé Mutualistes (RNCMS). Network members – notably the center in Ollioules, Var – are already using CLM products, and this contract is yet another vote of confidence.

#### **Web-based solution enhances the product range**

There are an estimated 1,454 health centers in France (source: USMCS) run by local authorities, associations, and mutuals. CLM offers these centers – regardless of their status or size – solutions tailored to meet their needs. Its product range for health centers includes [Crossway](#) combined with the web-based [MLM](#) solution, which was recently awarded e-santé v2 certification for Health Centers and multidisciplinary structures

“Health centers play a vital role in access to care. Like multidisciplinary structures, more of them are turning to CLM for our expertise and our product range, which now lets them choose between a software installation or web-based solution,” said [Dany Huppenoire, CEO of Cegedim Logiciels Médicaux](#).

To date, more than 350 multidisciplinary structures and health centers have chosen a CLM ehealth solution.

**About Cegedim Logiciels Médicaux (CLM):**

Cegedim Logiciels Médicaux (CLM), medical software publisher and service provider, is a leading player in doctor computerization in France. CLM listens closely to the needs of healthcare professionals, and its teams develop and market solutions that help them run their practices day in and day out. In today's rapidly changing environment, notably with respect to medical professional demographics and course of care, CLM's software offerings (MLM, Crossway, MédiClick, Crossway CDS, and MSP Solution) give doctors patient record management solutions that are 100% certified, suited to their practice, regulatory compliant, innovative and scalable. Medical content can be personalized for each specialty, interfaces adapt to multiple work spaces (private practice, group practice, multidisciplinary structures or medical center), and the software enhances mobility, data sharing and care coordination. The company's innovative software uses Pack Connect CLM for connected health and Docavenue for the most advanced doctor-patient communications. CLM employs 150 people, including more than 100 in regional offices to give doctors personalized service.
