

PRESS RELEASE

Cegedim Logiciels Médicaux to supply the Rodez Multidisciplinary Health Center

CLM's Solution MSP will help coordinate the work of medical and paramedical professionals in the Aveyron department

Boulogne-Billancourt, September 7, 2017

Cegedim Logiciels Médicaux (CLM), medical software publisher and service provider to healthcare professionals, has signed an agreement to supply the Rodez Multidisciplinary Health Center with its Solution MSP. The center will eventually house 70 healthcare professionals, who will now have access to a collaboration platform specifically designed to allow multidisciplinary healthcare teams to successfully coordinate patient care.

The Rodez multidisciplinary health center – set to become one of the biggest in the Aveyron department – will roll out Cegedim Logiciels Médicaux's Solution MSP in two stages. Starting November 15, 2017, ten doctors and ten paramedical professionals, mainly nurses, will be able to log onto the platform from their workplaces. Then, once construction of the downtown Rodez facility is complete, the solution will be deployed throughout the health center, which will eventually house 70 healthcare professionals.

"The flexibility and the range of functions offered by the solution, as well as the personalized support powered by CLM, meet the expectations of multidisciplinary health centers that take an active part in the way care is provided" said Dany Huppenoire, CEO of Cegedim Logiciels Médicaux.

Coordinating care among multiple specialists

Designed specifically for multidisciplinary health clinics and centers of every size, whether on one site or multiple sites, the platform is based on the MLM (monLogicielMedical.com) solution, which in early 2017 earned Version 2 of the e-Santé "Health Clinics and Health Centers" certification. It offers professionals a full range of tools for managing the medical and administrative aspects of care (medical records, invoicing, secure messaging, smartphone apps, and more) from the moment patients walk through the door and for as long as they need treatment, notably with the help of chronic care management tools.

"Cegedim's offers for doctors, allied health professionals and pharmacists all complement each other, showing that Solution MSP is a well-designed product from every angle. It is part of the answer to the problem of medical deserts, and it is enhancing collaboration among regional professionals while still allowing them to run their practice as they see fit. Solution MSP is also compatible with new forms of compensation," added Dany Huppenoire.

The Rodez health center has chosen a package that includes the Docavenue platform, which puts patients in closer contact with their healthcare providers via a user-friendly appointment-scheduling app paired with text-message appointment reminders.

This latest contract gives Cegedim Logiciels Médicaux a solid presence in the Aveyron department. And more than 300 health clinics and centers are now using a CLM product.

About Cegedim Logiciels Médicaux (CLM):

Cegedim Logiciels Médicaux (CLM), medical software publisher and service provider, is a leading player in doctor computerization in France. CLM listens closely to the needs of healthcare professionals, and its teams develop and market solutions that help them run their practices day in and day out. In today's rapidly changing environment, notably with respect to medical professional demographics and course of care, CLM's software offerings (MLM, Crossway, MédiClick, Crossway CDS, and MSP Solution) give doctors patient record management solutions that are 100% certified, suited to their practice, regulatory compliant, innovative and scalable. Medical content can be personalized for each specialty, interfaces adapt to multiple work spaces (private practice, group practice, multidisciplinary clinic or medical center), and the software enhances mobility, data sharing and care coordination. The company's innovative software uses Pack Connect CLM for connected health and Docavenue for the most advanced doctor-patient communications. CLM employs 150 people, including more than 100 in regional offices to give doctors personalized service.
